Oct.24: S4, S5; **Oct.25:** S1.1, S1.2; **Oct.27:** S9, S2, S7; **Oct.28:** S8, S3, S6

S1.1 Session 1 EM and integrated geophysical studies of the Earth, Part I : near surface applications, including environmental and engineering studies

S1.2 Session 1 EM and integrated geophysical studies of the Earth, PartII: Crustal and mantle studies, including regions with seismic and volcanic activity

S2 Laboratory studies of electrical properties of rocks activity

S3 Special session on EM exploration in China

S4 Applied EM methods for hydrocarbon, geothermal and mineral exploration

S5 2D/3D modeling and inversion of EM data, including joint inversion techniques

S6 Marine EM studies

S7 Theoretical aspects of EM exploration, including data processing, response function analysis and distortion analysis

S8 Global induction studies using satellite and ground EM data

S9 Potpourri Session: instrument development, natural source field studies, new projects, etc.
