//If all the authors are come from the same unit, the superscript can be omitted //

In this document we describe how to prepare and submit Short abstracts of the posts given in the 19th Electromagnetic Induction workshop hold on October 23- October 29, 2008 in Beijing, China. Local Organizing Committee will collect files and post them at the homepages of Beijing workshop (www.19emiw.cn) and at MTNet (www.geophysics.dias.ie/mtnet/). It should be noted that LOC will NOT DO any editorial work but will only post your file at given places. In other words, authors must provide "a camera-ready" copy of their abstract. The abstract file must be a PDF file (Adobe's Portable Document Format). Other types are not accepted. Similarly, files not meeting the format requirements specified in this document are not accepted.

This document is not a real template. Yet authors using MS-WORD can use this document in a similar manner by adding their text, and submitting one single PDF-file online at the website (www.19emiw.cn) or as an attachment file sent to EMNet-China@ies.ac.cn or CXB@pku.edu.cn by email BEFORE June 1, 2008. Authors using other platforms and word-processors (e.g. LaTeX) should format their documents according to instructions given in the text.

The format of the short abstract is simple. Maximum length of the short abstract is 1 page. Title and authors are given using Arial fonts (centered, 12 pts bold and 10 pts general, respectively). The straight matter should span entire page (both columns), and use regular Times New Roman, 10 pts, justify, single line spacing.

The following parameters have been used for page setup in this document. Margins: 3 cm (top), 2 cm (other). Paper Size: A4 (21 cm x 29.7 cm), portrait. Header and footer: 1.3 cm from margin, different first page header and footer.
